EDUCATION

B.Sc. in Computer Science | Azrieli College of Engineering *2024 – 2027 (Expected)*

EXPERIENCE

Software Developer | Azrieli College of Engineering | *01/2026 – Present*

- **LabBooker (Lead Developer):** Architected and rebuilt the college's management platform from scratch (**MERN, Docker, API & Integrations**). Optimized scheduling logic and backend performance for high concurrency.
- **Infrastructure:** Set up and configured high-performance computing (HPC) and GPU-intensive server environments using **Proxmox** to power the college's software labs.

Full-Stack Developer | Daily-English Startup | 11/2023 – 01/2024

- **Data Integration & Logic Optimization:** Optimized complex data flows and API logic using **TypeScript** and **React**, enhancing state synchronization and performance.

PROJECTS

SHOPME – Full-Stack E-commerce

- Architected a high-performance **MERN** e-commerce platform; engineered secure JWT-based authentication and optimized MongoDB schemas for complex product querying and data integrity. (**Tech**: **TypeScript, Mongoose, React Query, Redux Toolkit, Winston, Bcrypt, MUI)**

Geekon Hackathon 2025

• Developed a functional AI-driven backend prototype within a 72-hour high-pressure sprint; integrated LLM APIs in Python to deliver a working software solution from concept to execution.

SKILLS

- **Languages & Tech**: Java, C, C++, Python, JS, TypeScript, MERN, Docker, Git.
- **Databases**: MongoDB, PostgreSQL, SQL.

MILITARY SERVICE

- **Training & Readiness Commander**: Managed professional qualification and operational readiness for senior leadership and commissioned officers, while leading intensive combat training programs in high-pressure environments.
